# Document information

Create a work permit

Reference: DEMO-SOP-001

Version: 1.0

Status: Draft

# Purpose

Create a work permit and confirm its details before submitting it for review.

# Scope

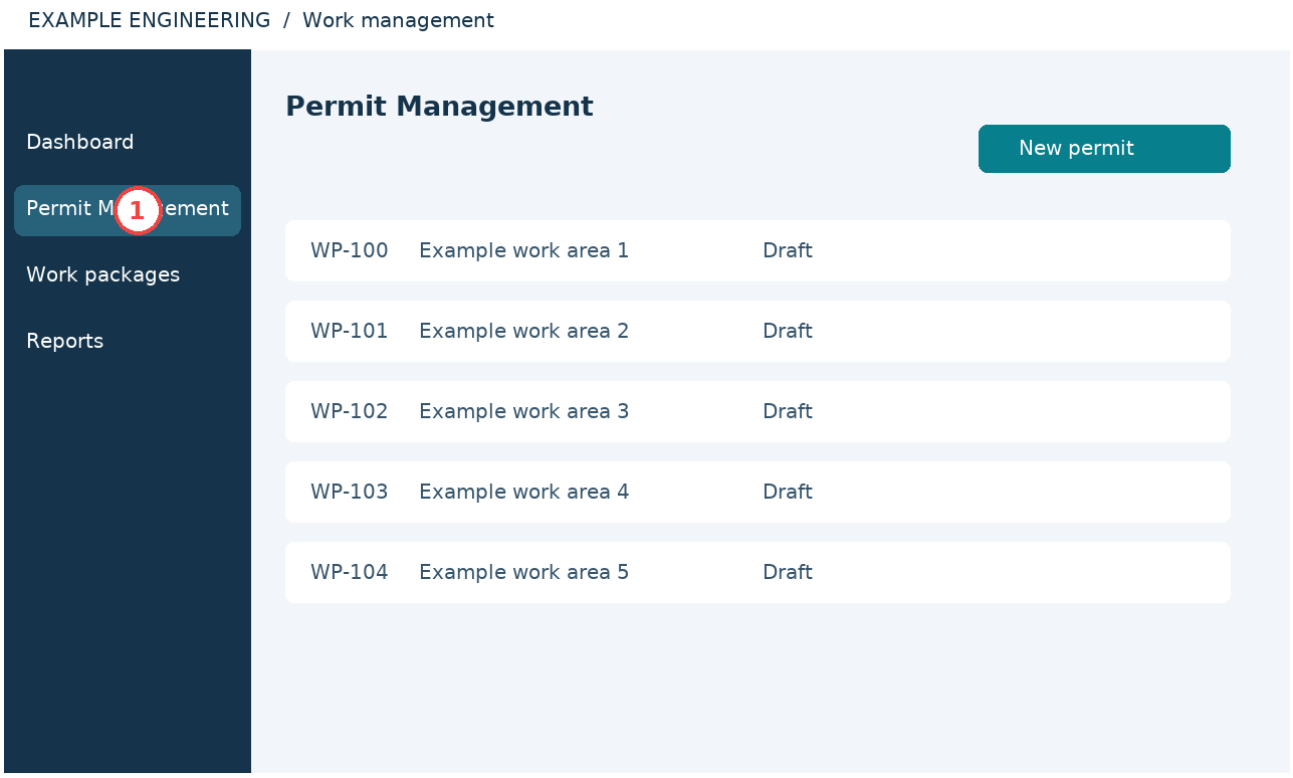

Demonstration of a local SOP project using a fictional application and synthetic information.

# Prerequisites

Access to the permit dashboard and the relevant work order. All screenshots in this example are fictional.

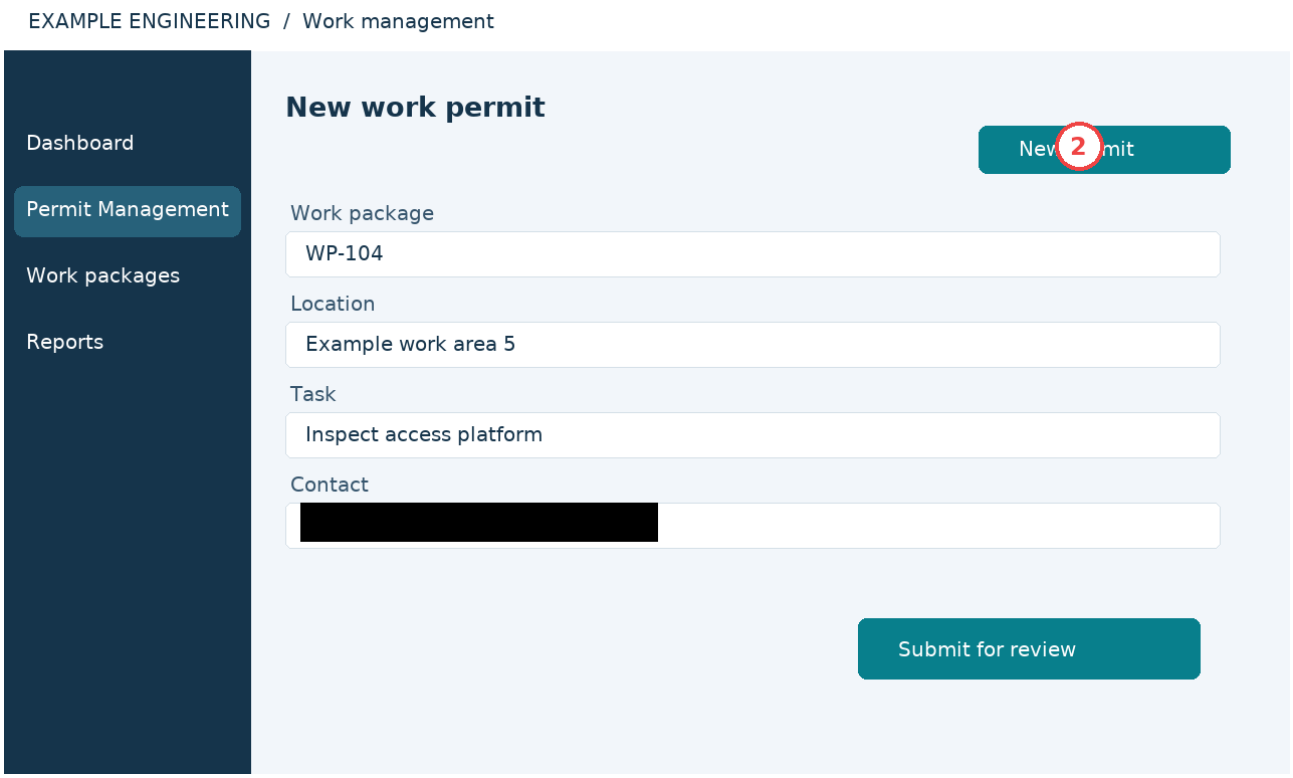

# Procedure

## 01 Open Permit Management

Choose Permit Management from the navigation menu to view the available permits.

# 02 Create a new permit

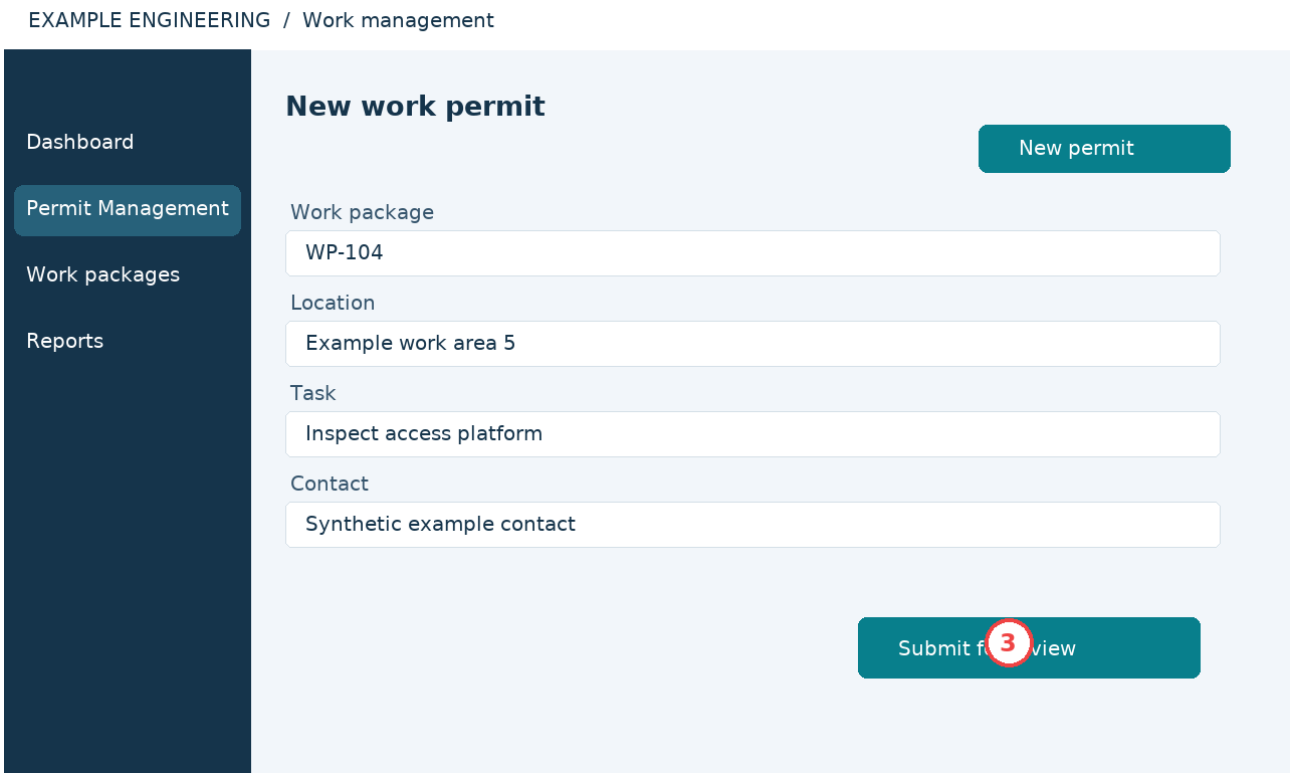

Select New permit. Enter the work package and check the proposed location. Redact sensitive information before sharing screenshots.

Notes / warnings

Solid redactions remove visible pixels from the exported image. Original project images remain unredacted.

# 03 Review and submit

Check the work area, task description and required approvals. Select Submit for review when the details are correct.
